

Bravo Series | BRT Transfers & Conveyors

Linear Cross Bar Conveyor with Hood

Linear Transfer with V Rollers

Drop Down Rollers and Take Away Belt

In-Feed Transfer with Metal Track

BRT	
Max. Working Width:	8" (optional to 12")
Min. Working Length:	36"
Feed Speed:	35 - 300 FPM
# of Feed Belts:	4 to 12
# of Feed Rollers:	12 to 30

The Bravo Series Transfers and Conveyors are designed for aligning the profiled work-pieces and transferring them to a designated machine or process in a simple and rational manner.

We offer lateral transfers for both out-feed, in-feed, and lateral cross transferring. We also offer linear conveyors, speed up conveyors, and special handling equipment for linear work-pieces.

Typical transfer equipment utilizes a system of belts and rollers to transport the workpiece. Directional changes of the workpiece are accomplished by drop down rollers and take-away conveyor belts for the out-feed. The in-feed transfers utilize a lateral feed belts and angled linear feed rollers to align the work-piece going into the next machine.

Features:

- Heavy Duty Construction
- In-feed, Out-Feed and Lateral Cross Transfers
- Conveyors with V Cross Bars, V Rollers, or Belt Conveyor
- Integrated Line Controls for Complete Lines
- Custom Designed Applications
