

## Mini Plus Spray Machine

provides a simple and efficient solution to your finishing needs. This automated spray machine offers superior consistency and waste management compared to hand spraying with its pressurized cabin and reading system to minimize overspray. The Mini Plus is the perfect solution to a variety of challenges for small to medium sized production lines from quality issues and labor shortages to increased production needs it offers unparalleled flexibility, control and cost savings.

## Features

- Single-arm reciprocating sprayer
- Ideal for small-medium sized production lines
- Upper ventilation unit provides cabin pressurization to reduce overspray and control ventilation
- Paper belt conveyor system allows for easy cleanup
- Photo Diode reading system accurately reads part dimensions to reduce overspray and coating waste
- Touch screen controls allow for easy operation
- Automatic color change included for three primary coatings and flush system
- Spray guns and pump package options available

## Technical Specifications

### Machine Specifications:

Height: 9' 2"  
Width: 12'  
Length: 11' 8"

Feed Speed: 1 to 3 meters/min.  
3 to 9 ~feet/min.

Conveying System: Paper Belt  
Operating Controls: Color Touch Screen  
Electric Power: 480v, 3 phase 35 Amps  
Compressed Air: 6 bar / 87 psi  
Air Connection: 14 mm dia.  
Air Exhaust: 8000 m<sup>3</sup>/h

### Workpiece Specifications:

max. Thickness: 3.5"  
max. Width: 51"
